

# Lined Concrete Burial Vaults

**VANDEN BOOMEN**  
BURIAL VAULTS, INC

# Security & Protection

**PROTECTIVE LINED BURIAL VAULT**

Steel reinforcement, Doric's exclusive Integra-Seal® which joins the lid and base, and thermoformed inner liner provide added strength for the ultimate in protection.

**BASIC GRAVELINER**

An unsealed concrete box allows ground water to enter the container through drainage holes in the bottom and around the unsealed cover.

**UNPROTECTED CASKET**

A casket which does not have outer protection will eventually collapse under soil pressure and the weight of cemetery maintenance equipment.

The backhoe, the preferred choice to open a grave, weighs in excess of ten tons. This weight, the daily grind of cemetery equipment and the constant forces of soil pressure reinforces the need for protection. To combat these forces, Doric manufactures one of the strongest lined concrete burial vaults in the industry today. Doric vaults are lined with our exclusive poly-ribbed liners which contain the contents inside the vault, thus protecting our environment. The cover, where the forces are the greatest, is steel reinforced for added protection to an already premium vault.
